Flower Stories

Page 5:

In the wet season, we usually see northern milkwood and cabbage palm flowers. Food is only from the water. Fish, stingray and young shark.

Page 7:

In the mid wet season, we usually see wild passionfruit flower. There is only food from the sea, fish and shellfish.

Page 9:

The end of the wet season is the time for harvesting food. You can find and collect food anywhere in the bush, mangroves, billabong and sea. We usually see the flowers of goat's foot creeper, swamp banksia, starflower, fern-leaved grevillea and waterlilies.

Page 11:

In the cool dry season, we usually see starflower, Darwin woollybutt flower and fern-leaved grevillea flowers. Food is in the bush and sea: yams, seagull eggs, mangrove worms, turtle eggs, crabs and oysters.

Page 13:

In the hot dry season, we usually see the flowers of red-flowering kurrajong, wild cow pea and Kakadu plum. Food is in the bush and in the sea: turtle, honey, crabs, black-lipped oyster and magpie geese.

Page 15:

In the build-up we usually see the flowers of cocky apple, Cardwell cabbage and green plum. Food is in the bush and the sea. Young sharks, crayfish and yams.

Page 17:

In the pre wet season we usually see the flowers of swamp lily and octopus bush. Food is in the bush and the sea. Stingray, young shark, crayfish and yams.
